Subject index

Page numbers marked with an asterisk denote book reviews

Acidity
  mangoes *214*
  methane fermentation *198*
Additives, lubricants *223*
Aflatoxin, contamination of Indian cooking oils *229–232*
Agave spp., steroid source *143, 144*
Agriculture *see also* Harvesting *etc.*
  production contracting **183*
  tropical **182*
Aid, British, relief of malnutrition **175*
Alcohol, as motor fuel *5–12*
Alphonso, mango variety, ripening *95–101*
Amino acids, yams *107–109*
Animals, sources of steroids *141*
Apples, pomace as a source of pectin *29*
Aspergillus spp.
  groundnut drying *19, 22*
  mangoes *97*
Aspergillus niger, melons *68*

Bacteria *see also* under specific names
  methane producing *198–205*
Balanites spp., steroid source *144*
Bananas, storage physiology, new tetraploid clones *155–163*
Belize, *Pinus oocarpa* and *P. caribaea*, gum turpentine analyses *166*
Blood, goat carcase *130*
Bone, goat carcase *128*
Botryodiplodia spp., mangoes *97*
Brazil, castor *218*
Breeding, yams *149*
Brisbagenin, steroids *145*
Butchery, goats *125*

Cannigenin, steroids 145
Carbon dioxide, methane fermentation *197*
Carcase, goat *123–138*
δ–3– carene, gum turpentine analyses from *Pinus* spp. *165–174*
Caribbean, sugar industries **115*
Casings, natural animal **119*
Cassava
  processing and storage **112*
  research **112*
  utilization and potential markets **112*
Castor oil, industry and use as lubricant *217–228*
Castor plant *218*
Cereals, technology **236*
Chalimbana, groundnut variety, drying trials *17*
Chile, melons exported to Britain *62*
Cholesterol, steroids *141, 142*
Cholic acid, steroids *141*
Citrus, waste as pectin source *28, 29*
Cladosporium cucemerinum, melons *66*
Classification, scientific **249*
Climate, groundnut cultivation *16*
Clones, storage physiology of tetraploid banana clones *155–163*
Clostridium, fermentation *5*
Cocoa
  diseases **116*
  pectin source *33*
Coconuts **49*
  oil, as fuel *4*
  water, alcohol yield *11*
Coffee, pectin source *33*
Colletotrichum gloeosporioides, mangoes *97*
Colombia
  melons exported to Britain *63*
  pectin from papaya fruit *30*
Colour, mangoes *98–99, 212–215*
Concentration, pectin extract *36*
Cooking, yams *105*
Co-operatives
  agricultural co-operatives and marketing boards **51*
  fishery **52*
Cordylagenin, steroids *145*
Cordyline spp., steroid source *145*

Corn
alcohol yield *8*, *11*
oil, aflatoxin contamination *229–232*
Cosmetics, castor oil use in *219–222*
Costs *see also* Prices
fish drying and smoking *85–88*
Costus speciosus, steroid source *144*
Crops, marketing food crops, tropical Africa **114*

Desoxycholic acid, steroids *141*
Digester, waste purification *203–206*
Dioscorea spp. *see* Yams
Diosgenin, steroids *140*, *141*, *143*
Diplodia spp., mangoes *97*
Dips (farm animals), castor oil use in *219–222*
Disease *see also* Pests
banana, disease resistance *156*
cocoa **116*
yams *148*
Disinfectants, castor oil use in *219–222*
Drying
fish drying plant *75–93*
groundnuts *15–24*

Early runner, groundnut variety, drying trials *17*
Ecuador, melons, quality of melons exported to Britain *63*
Engine, internal combustion *5*
Essential oils, citrus fruits *30*
Ethanol, produced by fermentation *1–13*
Ethrel, mangoes, ripening treatment *95–101*
Ethylene, mangoes, ripening treatment *211–216*
Extraction, proto-pectin to soluble pectin *36*

Fat, goat carcase *128*, *130*
Feedstuffs
industry **184*
toxic constituents **119*
Fenugreek, steroid source *144*, *149*
Fermentation
ethanol production *1–13*
methane production *193–209*
Fish
drying and smoking plant *75–93*
industry, co-operatives **52*
protein concentrate **48*
Flavour, emulsions, pectin *28*
Food
natural toxicants **117*
technology **240*
Forestry, terminology, Spanish **57*
Fruit
industry, production contracting **183*
juice, processing **239*
post-harvest physiology, handling and utilization **177*
Fuel, ethanol produced by fermentation *1–13*
Fungi, melons *66*
Fusarium spp., melons *66*

Gases, as fuels *3*
Gels, pectin *28*
Gentrogenin *141*
Ghana
cocoa as pectin source *33*
experimental fish drying and smoking plant *75–93*
Glycine soja see Soya bean
Goats, meat-producing characteristics *123–138*
Grading
commercial pectins *38*
melons *65*, *66*
Grand Bahama, *Pinus caribaea*, gum turpentine analyses *166*
Greases *219–222*, *226*
Groundnuts
drying trials in Malawi *15–24*
oil, aflatoxin contamination *229–232*
Gum turpentine, analyses of some *Pinus* provenances *165–174*

Haden, mango variety, ripening *212*
Harvesting
groundnuts *16*
yams *148*
Heat, stability of aflatoxin in cooking oils *229–232*
Hecogenin, steroids *143*
Honduras, *Pinus oocarpa*, gum turpentine analyses *166*
Honeydew, melon variety, quality *61–74*
Horticulture
French-English dictionary **181*
product quality **238*

Humidity
banana storage *157*
mango storage *97*, *212*
Hydraulic brake fluids, castor oil use in *219–222*

Indexing, scientific **249*
India
cooking oils, aflatoxin contamination *229–232*
mango ripening *95–101*
pectin from citrus waste *29*
Insecticides, pyrethrum **53*
Israel, mango ripening *211–216*
Ivory Coast, plants, medicinal **244*

Jam, pectin *27*
Jelly, pectin *27*, *38*
Juices, fruit and vegetable, processing **239*

Light, effect on sprouting in stored yams *45–46*
Longifolene, gum turpentine analyses from *Pinus* spp. *165–174*
Lubricants, comparison of lubricants from castor oil, mineral oil and synthetics *217–228*

Mabruka, mango variety, ripening *212*
Machinery/equipment *see also* Plant
racks, fish drying *77*, *80*, *81*
scaler, fish *82*, *88*
smoker/dryer, fish *78*, *83*, *84*
Makula Red, groundnut variety, drying trials *18*
Malawi
goats, meat-producing characteristics *123–138*
groundnut drying trials *15–24*
Malnutrition, British Aid **175*
Mangoes, ripening *95–101*, *211–216*
Marketing
food crops in tropical Africa **114*
goats, Malawi *136*
marketing boards and agricultural co-operatives **51*
Maya, mango variety, ripening *212*
Measurements, goats, external body and carcase measurements *126–136*
Meat
goat *123–138*
hygiene **241*
inspection **243*
Medicines, plants, Ivory Coast **244*
Melons, honeydew, quality *61–74*
Methane, fermentation *5*, *193–209*
Methanobacterium spp., methane fermentation *199*
Methanococcus vannielii, methane fermentation *199*
Methanosarcina barkeri, methane fermentation *199*
Microbiology, food technology **180*
Mineral oil, as lubricant *224*
Mono terpenes, gum turpentine analyses from *Pinus* spp. *165–174*
Mwitunde, groundnut variety, drying trials *17*

Naval stores industry, gum turpentine analyses of *Pinus* spp. *172*
Nicaragua, *Pinus oocarpa* and *P. caribaea*, gum turpentine analyses *166*
Nutrition, in rural monsoon Asia **111*
Nylon, castor oil use in *219–222*

Offal, goat carcase *128*, *133*
Oil
cooking, aflatoxin contamination *229–232*
vegetable, as fuel *4*
Oleoresins, gum, analyses of *Pinus* spp. *165–174*

Packaging, melons, South American honeydew melons imported into Britain *61–74*
Paints, castor oil use in *219–222*
Pakistan, pectin from roselle *30*
Paper
industry **55*
technology **245*
Parasites, goats *132*
Paris spp., steroid source *144*
Passion fruit, pectin source *30*
Peanuts *see* Groundnuts
Pectin *25–44*

Penicillium spp.
groundnuts *22*
mangoes *97*
melons *68*
Perfumes, natural **186*
Peru, melons, quality of melons exported to Britain *63*
Pests *see also* Diseases
yams *148*
Petroleum, fuel *1–13*
Pharmaceuticals, castor oil use in *219–222*
β–Phellandrene, gum turpentine analyses from *Pinus* spp. *165–174*
Philippines
pectin sources *30*
Pinus kesiya provenance, turpentine composition *171*
Photographic materials, technology **245*
Physiology, stored bananas from tetraploid clones *155–163*
Pine *see Pinus* spp.
α–Pinene, gum turpentine analyses from *Pinus* spp. *165–174*
β–Pinene, gum turpentine analyses from *Pinus* spp. *165–174*
Pinus caribaea **187*
gum turpentine analyses *165–174*
Pinus elliotti, gum turpentine analysis *172*
Pinus kesiya, gum turpentine analyses *165–174*
Pinus oocarpa, gum turpentine analyses 165–174
Planning, developing countries **247*
Plant *see also* Machinery/equipment
alcohol, by fermentation *10–11*
experimental fish drying and smoking plant *75–93*
Plants
actual and potential sources of steroids *139–154*
medicinal, Ivory Coast **244*
Plasticizers, castor oil use in *219–222*
Plastics, technology **245*
Prices *see also* Costs
fish, dried and smoked *89–92*
pectin *40*
Processing *see also* under the name of the particular process
cassava **112*
pectin *34–37*
Project appraisal, developing countries **247*
Protein foods **47*
Proteins
foods and malnutrition **175*
yams as a source of edible proteins *103–110*
Pulp, industry **55*
Pulp (fruit)
bananas, softening *157–158*
melons, softening *72*
Purity, commercial pectin *37*
Pyrethrum **53*

Quality
horticultural products **238*
melons, South American honeydew melons exported to Britain *61–74*
proteins, in edible yams *104*

Reproduction, goats *137*
Respiration, mango fruit *98*
Rhizopus, spp., groundnuts *22*
Rice **233*
parboiling **235*
Ricinus communis L. *see* Castor
Rind, melons, measurement of rupture force *70–71*
Ripening
mangoes *95–101, 211–216*
melons, optimum time of harvest *73*
Roselle, as pectin source *30*

Saccharomyces cerevisiae, fermentation *4*
Safflower, oil *221*
Sarsasapogenin, steroids *145*
Sclerotium, spp., groundnuts *22*
Sesqui terpenes, gum turpentine analyses from *Pinus* spp. *165–174*
Shed, fish drying and smoking *77, 80*
Smilagenin, steroids *142, 143*
Smilax spp., steroid source *143*
Smoking, fish smoking plant *75–93*
Solanum spp., steroid source *142*
Solasodine, steroids *141, 142*

Soya bean, steroid source *141*
Sprouting, yams, white, in storage *45*
Standards, commercial pectins *38*
Steroids, actual and potential plant sources *139–154*
Stigmasterol, steroids *141, 142*
Storage
  bananas, physiology of bananas from tetraploid clones *155–163*
  cassava **112*
  mangoes *95–101, 211–216*
  melons, weight loss *66–67*
  yams, white *45–46*
Sugar
  cane sugar, alcohol yield *7, 8*
  industry in the Caribbean **115*
Sugars, melons, sugar content *66, 69*
Sunflower, pectin source *34*
Surface coatings, castor oil use in *219–222*
Sweet potato, alcohol yield *7*
Synthetic oil, as lubricant *224*

Temperatures
  banana storage *157, 160–162*
  mango storage *97, 212*
  methane producing bacteria *204*
Tetraploid clones, bananas *156*
Textiles
  castor oil use in *219–222*
  technology **245*
Texturizer, pectin *27*
Thickeners (food), pectin *28*
Timber
  Pinus spp., gum turpentine analyses *165–174*
  Pinus caribaea **187*
Tomatoes
  cultivation, processing, quality control **179*
  paste and tomato products **178*
Toxicity
  natural toxicants in food **117*
  toxic constituents in animal feedstuffs **119*
Transport
  bananas *162*
  melons *62*
Tribolium spp., biology and genetics **185*
Trigonella foenumgraecum, L. *see* Fenugreek
Triticale **238*

Turpentine, analyses of some *Pinus* provenances *165–174*

Ulocladium chartarium, melons *66*

Vegetables
  industry, production contracting **183*
  juice, processing **239*
  post-harvest physiology handling and utilization **177*

Wastes
  from fermentation plant *11*
  treatment *203–206*
  treatment plant *6*
Weight
  goats, live and carcase weights *127–131*
  melons, losses in stored melons *66, 67*
Wheat, technology **236*
Wood, technology **245*
Writing, scientific papers in English **248*

Yams
  edible protein source *103–110*
  sprout growth in stored white yams *45–46*
  steroid source *140, 143–149*
Yeast, fermentation *4, 5*
Yucca spp., steroid source *143, 145*

Zambia, *Pinus kesiya*, gum turpentine analyses *165–174*

WHYTE, R.O.
Rural nutrition in monsoon Asia *111*

List of plates, figures and tables

Groundnut drying trials in Malawi

Table 1 Lifting dates, rainfall data and mean drying times required for field samples of 'Mwitunde' kernels over four seasons *19*

Table 2 Lifting dates, rainfall data and mean drying times required for field samples of 'Chalimbana' kernels over four seasons *20*

Table 3 Lifting dates, rainfall data and mean drying times required for field samples of kernels of 'Early Runner' and 'Makulu Red' over two seasons *21*

Table 4 Mean drying times required for field samples of all cultivars over all seasons *22*

Commercial pectin: a review

Figure 1 Poly-galacturonic acid *26*

Figure 2 Stages in the production of powdered pectin *35*

Table 1 Food applications of pectin *28*

Table 2 The recovery of essential oil and pectin from Indian fruits by a proposed integrated industrial process *30*

Table 3 Pectin from various sources: content, yield and chemical properties *31*

Table 4 Pectin content, jellying potential and extent of esterification of pectin substances of various tropical fruits and plant materials *32*

Table 5 Major European imports of pectic substances, pectinates and pectinates dry, 1968–72 *39*

Quality problems of South American honeydew melons imported into Britain

Plate I Peruvian melons typically packed in a slatted wooden crate lined with a single sheet of corrugated board *facing 64*

Plate II Colombian melons packed in a strong cardboard box with telescopic lid and corrugated partitions *facing 64*

Plate III Ecuadoran melons showing cutting and abrasion of fruit as a result of inadequate packing in slatted wooden crates *between 64 and 65*

Plate IV Peruvian melon severely infected with *Ulocladium chartarum* (Pr.) Simmons *between 64 and 65*

Plate V Colombian melon showing stem-end rot caused by *Fusarium semitectum* Berk. & Rav. *between 64 and 65*

Figure 1 Box-grading of South American melons imported into London *65*

Figure 2 Weight losses during the storage of Ecuadoran melons at 15° and 25°C *67*

Figure 3 Soluble solids (sugar) content of South American melons imported into London *69*

Figure 4 Rupture force of rind of melons during storage *70 and 71*

Figure 5 Softening of the pulp during the storage of Colombian melons (grade 8) *72*

Table 1 Fungi isolated from some commercial shipments of South American melons arriving in London between January and March 1974 *68*

An experimental fish drying and smoking plant on Volta Lake, Ghana: design, construction and economic considerations

Plate VI Fish drying and smoking plant *between 64 and 65*

Plate VII Drying rack with slanting top *between 64 and 65*

Plate VIII Smoker-dryer *between 64 and 65*

Plate IX Smoker-dryer in use *between 64 and 65*

Figure 1 Experimental fish drying and smoking plant: layout and flow diagram *79*

Figure 2 Shed. Portable drying rack *80*

Figure 3 Fixed drying racks, with flat and slanting tops *81*

Figure 4 Roller for plastic sheeting, and fish scalers *82*

Figure 5 Smoker-dryer: vertical section; base and fireplace; connecting pipe in cross section *83*

Figure 6 Smoker-dryer: shelf; shelf in vertical section; chimney *84*

Figure 7 Relationship of monthly profit to wholesale price and daily fish supply at 35% and 40% yield *90*

Table 1 Position of openings and dampers of smoker-dryer for smoking and drying *78*

Table 2 Materials required, and costs, for the construction of an experimental fish drying and smoking plant at the marina, Akosombo, Ghana *85, 86 and 87*

Table 3 Estimated prices of fresh and smoked fish for local and VLRP products *91*

Accelerated ripening of 'Alphonso' mangoes by the application of Ethrel

Plate X 'Alphonso' mangoes of 15 weeks' maturity showing ripening responses 10 days after the treatments *facing 65*

Table 1 Effect of Ethrel on the ripening of 'Alphonso' mangoes *99*

Table 2 Effect of treatments on the respiration of 'Alphonso' mangoes *100*

Yams as a source of edible protein

Table 1 Yam samples examined *105*

Table 2 Total nitrogen, crude protein, and amino acid profiles of yam samples *107*

Table 3 Comparison of the amino acid composition of yams reported by Busson and the present study *108*

Table 4 Chemical scores and levels of essential amino acids in yams examined at TPI *109*

The meat-producing characteristics of the indigenous Malawi goat

Plate I Mature male Malawi village goat *facing 130*

Plate II Dressed carcase of male Malawi village goat *facing 131*

Table 1 External body measurements of live male goats *127*

Table 2 Component weights of male goats *128*

Table 3 Means of carcase measurements of male goats *129*

Table 4 Carcase component weights of male goats *130*

Table 5 Live weight yields of male goats *131*

Table 6 Correlation coefficients between live and carcase weights and external body and carcase measurements *131*

Table 7 Parasites found in Malawi village goats *132*

Steroidal sapogenins: a review of actual and potential plant sources

Figure 1 Diosgenin. Gentrogenin. Solasodine *141*

Figure 2 Desoxycholic acid. Cholic acid *141*

Figure 3 Cholesterol *142*

Figure 4 Stigmasterol *142*

Figure 5 Smilagenin. Hecogenin *143*

Storage physiology of bananas from new tetraploid clones

Figure 1 Fruit softening for individual hands within banana bunches stored at 14°C *158*

Figure 2 Preclimacteric periods of hands of two banana bunches stored at 14°C *159*

Figure 3 Preclimacteric periods of 19 bunches of tetraploid clone B, harvested over a range of caliper grades and stored at 14°C *161*

Table 1 Mean preclimacteric period of bananas of different clones *160*

Table 2 Effect of storage temperature on chilling injury and preclimacteric period for bananas of different clones *162*

Further gum turpentine analyses of some *Pinus oocarpa*, *P. caribaea* and *P. kesiya* provenances

Table 1 Summary of mean turpentine composition by provenance *168*

Table 2 *Pinus oocarpa*—turpentine compositions of individual trees selected to show the range of types *169*

Table 3 *Pinus caribaea*—turpentine compositions of individual trees selected to show the range of types *171*

Table 4 *Pinus kesiya*—turpentine compositions of individual trees in provenance trial at Chati Forest Reserve, Zambia, selected to show the range of types *171*

Ripening of mango fruits with ethylene

Figure 1 Effect of ethylene treatment on colour changes of Haden mangoes *213*

Figure 2 Effect of ethylene treatment on total soluble solids and acids in Haden mangoes *214*

The castor oil industry: a comparison of lubricants derived from castor oil, mineral oil and synthetics

Table 1 Fatty acid composition of castor oil *218*

Table 2 Chemical reactions of castor oil and uses of products *219*

Table 3 Estimate of unmodified castor oil consumption by British industries in 1969 *220*

Table 4 Estimate of processed castor oil consumption by British industries in 1969 *221*

Aflatoxin contamination and its heat stability in Indian cooking oils

Figure 1 Heat stability of aflatoxin B_1 in cooking oils *230*

Contents

PAPERS

Renewable fuels: ethanol produced by fermentation. By W. E. Trevelyan, *Tropical Products Institute, London 1*

Groundnut drying trials in Malawi. By R. W. Gibbons and R. C. N. Laurence, *Agricultural Research Council, Malawi*, and D. Norse and R. A. J. Cox, *Ministry of Agriculture and Natural Resources, Malawi 15*

Commercial pectin: a review. By B. J. Francis and Jess-Mary K. Bell, *Tropical Products Institute, London 25*

Quality problems of South American honeydew melons imported into Britain. By L. Mimbela-Leyva, H. C. Passam, P. J. A. Reilly and Ann Wallbridge, *Tropical Products Institute, London 61*

An experimental fish drying and smoking plant on Volta Lake, Ghana: design, construction and economic considerations. By K. Watanabe, *Instituto Oceanográfico, Universidade de São Paulo, Brazil 75*

Accelerated ripening of 'Alphonso' mangoes by the application of Ethrel. By S. Lakshminarayana, M. Subbiah Shetty and C. A. Krishnaprasad, *Central Food Technological Research Institute, India 95*

Yams as a source of edible protein. By B. J. Francis, D. Halliday and Janet M. Robinson, *Tropical Products Institute, London 103*

The meat-producing characteristics of the indigenous Malawi goat. By J. E. Owen, *Tropical Products Institute, London 123*

Steroidal sapogenins: a review of actual and potential plant sources. By G. Blunden, *Portsmouth Polytechnic*, Miss C. Culling, *City University, London*, and K. Jewers, *Tropical Products Institute, London 139*

Storage physiology of bananas from new tetraploid clones. By J. Marriott and S. New, *Tropical Products Institute, London 155*

Further gum turpentine analyses of some *Pinus oocarpa*, *P. caribaea* and *P. kesiya* provenances. By C. L. Green and B. Keeble, *Tropical Products Institute, London*, and J. Burley, *Commonwealth Forestry Institute, Oxford 165*

The methane fermentation: a discussion paper. By W. E. Trevelyan, *Tropical Products Institute, London 193*

Ripening of mango fruits with ethylene. By Y. Fuchs, G. Zauberman and U. Yanko, *Institute for Technology and Storage of Agricultural Products, Bet Dagan, Israel,* and S. Homsky, *Ministry of Agriculture, Tel Aviv, Israel 211*

The castor oil industry: a comparison of lubricants derived from castor oil, mineral oil and synthetics. By N. Macfarlane, *Tropical Products Institute, London 217*

SHORT COMMUNICATIONS

Sprout growth in stored white yams (*Dioscorea rotundata* Poir.). By *O. Mozie, University of Nigeria, Nsukka 45*

Aflatoxin contamination and its heat stability in Indian cooking oils. By F. G. Peers, *Tropical Products Institute, London,* and C. A. Linsell, *International Agency for Research on Cancer, France 229*
